Basic Searching with FileSeek

Basic Searching with FileSeek

FileSeek is an easy-to-use file search app with advanced capabilities, but even basic searches require configuration. This guide showcases the two most common scenarios for searching and the options you should enable to make them work.

File and Folder Names Only

Open FileSeek and click on the "Advanced" tab.

Enable the following checkboxes:

- Search sub-folders
- Show file names that match the "include files" filter
- Show folder names that match the "include files" filter

• fortress • C:\Binary_Fortress\G	raphics • FileSeek Pro 6.7

Search Advanced Date Filters File Size Filters		h File Is before a search result	Show file na	folders contents using File Han imes that match the que imes that match the "ini- names that match the " names that match the "	ny text clude files" filter query text		Search	earch In New Tab
	e 🔹 Show this many line	s after a search result	E stow to be	names that match the	include mes muer		Pause	Stop
File Name	Extension	Path		Line#	File Size	Date Created		Date Accessed
<								>
c		~						

Click on the "Search" tab.

Click "Browse" next to the Path(s) field, and choose the folder that you want to search. You can also search network shares by entering their UNC paths, like this:

In the Include Files field, enter the text you want to search for in the file/folder names. For example, if you want to search for all files and folders with "logo" in the name, enter the following: *logo*. Leave the Query field empty.

Folder Name Match [Include	files filter]	<pre></pre>			

Click the Search button. Results will show in the bottom pane.

File Contents

Open FileSeek and click on the "Advanced" tab.

Enable the following checkboxes:

- Search sub-folders
- Process file contents using File Handlers
- Show file names that match the "include files" filter
- Show folder names that match the "include files" filter

File Size Filters	0		before a search result	Show folder	names that match the o names that match the "	uery text		Pause	Stop
ile Name	E	xtension	Path		Line #	File Size	Date Created		Date Access
<									

Click on the "Search" tab.

Click "Browse" next to the Path(s) field, and choose the folder that you want to search.

In the Include Files field, you can specify which file types should be searched. For example, if you want to search in the contents of PDF, text, and Word documents, enter the following: *.pdf|*.txt|*.doc|*.docx.

In the Query field, enter the text you want to search for. For example, to find all files with "checkcentral" in the contents of the file, just enter checkcentral. The Query box uses our custom text query syntax, which allows the use of operators to include and exclude words.

Click the Search button. Results will show in the bottom pane.

enterprise-level clients and W data and communications are we Software, the makers of CheckG security measures that support well as our own.	ll-protec <mark>entral</mark> , c	ed. Binary Fortress					

Note: If you see results that say there's no file handler for the file, you will need to install a third-party file handler/iFilter for that file type. We have a list of common ones here: **File Handlers for FileSeek**.

About FileSeek

FileSeek is an easy-to-use file search app that includes advanced functionality for power users! Search through files using simple queries or regular expressions. You can even sync your search settings between computers.
